High sensitivity aspirating smoke detectors

Stratos-HSSD High Sensitivity Smoke Detection products now protect some of the most important and symbolic assets of the British National Heritage.

The Crown Jewels have been housed in the Tower of London since 1303. In 1994 Her Majesty Queen Elizabeth II opened a purpose designed Jewel House. Fire protection is of paramount importance and so there was only one natural choice of product.

In 1841, a serious fire nearly led to the Crown Jewels being lost forever. It's reassuring to know it can't happen again...
