

Stratos-HSSD 2

**No second chance
without the earliest warning...**

...from the world's most sensitive smoke detector

Stratos-HSSD® is the only smoke detection product to employ a patented true 'AI' (Artificial Intelligence) system to control parameters such as sensitivity and major component monitoring.

Key benefits are extreme simplicity of set-up and reliable hyper-early detection. Stratos is the ONLY system capable of tracking normal environmental smoke density fluctuations and intelligently adjusting sensitivity to its optimum level.

AirSense Technology Ltd is the only smoke detection manufacturer to win the coveted Queen's Award for Technological Achievement.
