

Stratos[®] Micra[®] LOCALIZED ASPIRATING SMOKE DETECTOR 25

Key Features

- Ultra small low cost aspirating smoke detector for easy and discreet installation.
- High sensitivity provided by laser based forward light scatter mass detection with particle evaluation for reliable very early warning.
- Single sampling pipe up to 164ft (50m) in length.
- Unique ClassiFire[®] Perceptive Artificial Intelligence system that dynamically adjusts the detector's operating parameters, allowing for day to day changes in the protected environment and filter loading.
- Unwanted alarms from dust are avoided using patented Dual Technology LDD 3D³ Laser Dust Discrimination and elimination system.
- RS485 and RS232 communications built in as standard for networking, and remote communications.

Description

Stratos-Micra 25 is designed to provide very high sensitivity smoke detection in a small package.

ClassiFire Perceptive Artificial Intelligence ensures that the detector operates at optimum sensitivity for the protected environment, without the need for complex setup. This means the product will configure itself to provide high sensitivity in a computer room or reduced sensitivity in areas with a high ambient background.

The detector is designed to fit into a Docking Station. All sampling pipes and cables are connected to the Docking Station as a first fix operation leaving the detector to be fitted during the final commissioning phase if required. This ensures that detectors are less likely to be damaged during the installation.

Equipped with 'Fault' and 'Fire' relays on-board. Can be ordered with optional Input Relay Card which provides four levels of alarm, fault and three programmable inputs. Relay outputs provide a convenient method for remote monitoring by local fire alarm panels or Building Management Systems. Open Protocol available for 3rd party integration.

Applications & Acceptance

Stratos detectors have been successfully applied in tens of thousands of applications worldwide, ranging from Clean Rooms to Casinos.

Options Available

- Addressable Protocol Interface Cards APIC™ available for most popular industry signaling protocols.
- Command Module available for central monitoring and display.
- SenseNET compatible - up to 127 detectors per loop.
- Remote Display units available.
- Suitable for Stratos-MatrixScan, a patented software system which provides virtual addressable location detection - e.g. 10 physical detectors would provide up to 45 unique addressable locations.

Approvals

- Approved/listed by most major international fire protection certification agencies including UL, cUL, FM, MEA, CSFM. Contact AirSense Technology for other international listings.
